Recipe Template manager

With the "Recipe Template Manager" you can:

- Create and delete recipe templates.
 - Add/remove items from a recipe template.
 - Change the sort order of the items.
 - Group items into pages, which can be selected at runtime (only supported by cx-recipe)
 - Define items that can be used for filtering (only supported by cx-recipe).
- When nothing defined, the first 10 items are used.

HINT: To display the change in WebIQ Designer, close and reopen the Recipe Manager
